

COMPUTER CLASSROOM

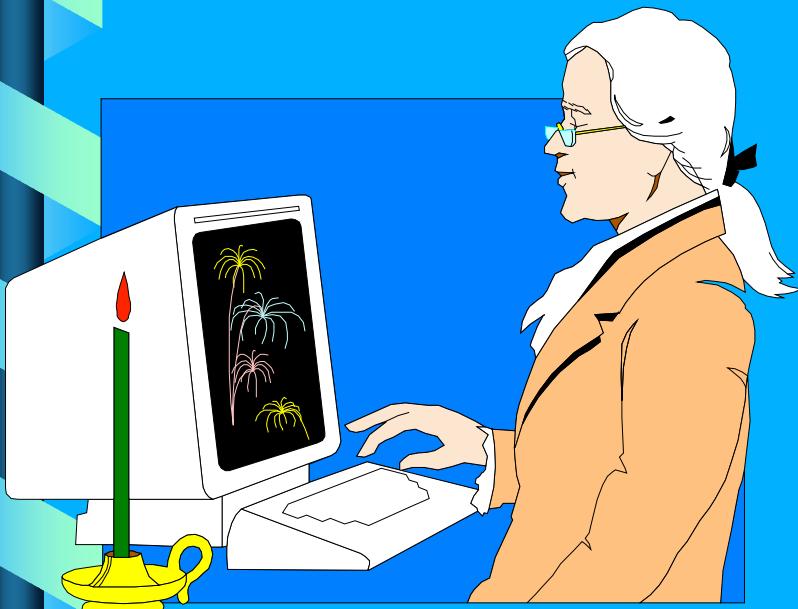

A PLACE WHERE CHILDREN ACQUIRE BASIC COMPUTER SKILLS AND KNOWLEDGE

Vanja Praznik and Zoran Vrbanac

Elementary School “Davorin Trstenjak”

Zagreb - Croatia

New computer technologies

- **fast development**
- **vast field of application**
- **phenomenon unique by**
 - **its proportions**
 - **its implications**
- **specially relevant to educational activities**

Impact of technologies on everyday life

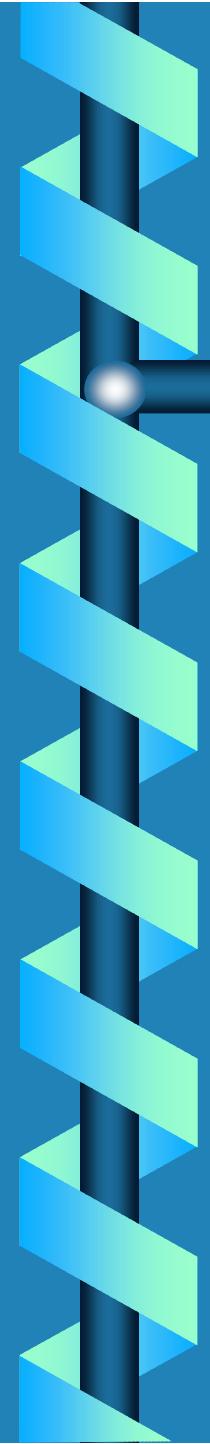

Particularly relevant in the process of learning

- **possibilities of systematizing various informations**
- **transformation into sources of knowledge and process of acquiring knowledge**
- **large variety of technologies for pedagogical needs**

Educational activities crucial tasks

- **pointing towards new forms of links between positive models in mankind development history and the shapes of modern ways of life and work**
- **giving young generations the knowledge and individual abilities aiming towards social integration**

Computer Science Optional Classes

- **started school year 1993 /94**
- **today 180 pupils grades 4th – 8th**

- **connected as temporary member in 1998**
- **a dedicated line permanent connection in the classroom**

Our Computer Classroom

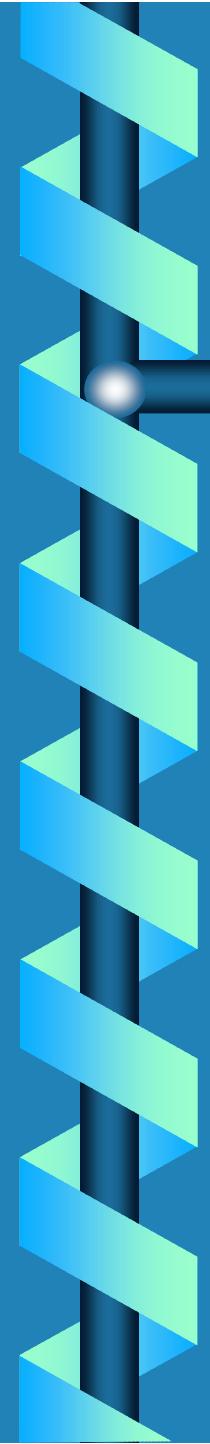

Hardware and Software

- **Installing**
- **Maintenance**
- **Upgrading**
- **Use**

Primary School “Davorin Trstenjak”

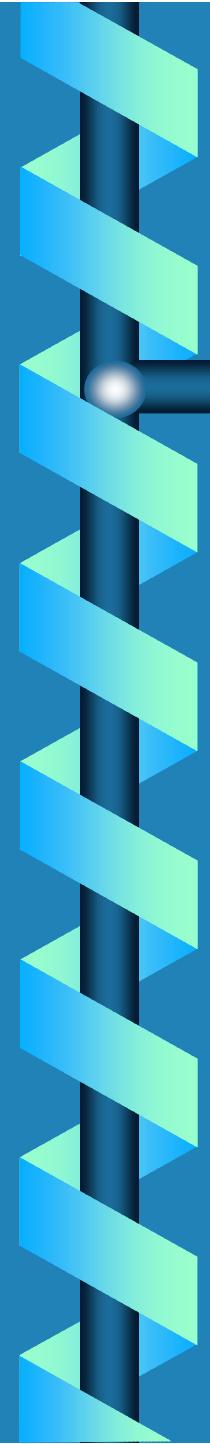

- **how did we start ?**
- **how did we go on ?**
- **things we have today ?**
- **our wishes and future plans ?**

how did we start ?

school year 1992 /93

- **parents contributions**
- **companies donations**
- **teachers personal involvement**

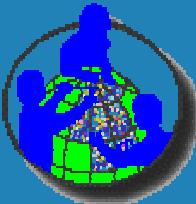

help on our way?

- 1. Ministry of Education's projects**
 - **buying computer equipment**
 - **employing computer science teachers as computer classroom administrators**
- 2. tax deductible donations**
- 3. great personal involvement of teachers and parents**

GLOBE program

The GLOBE Program

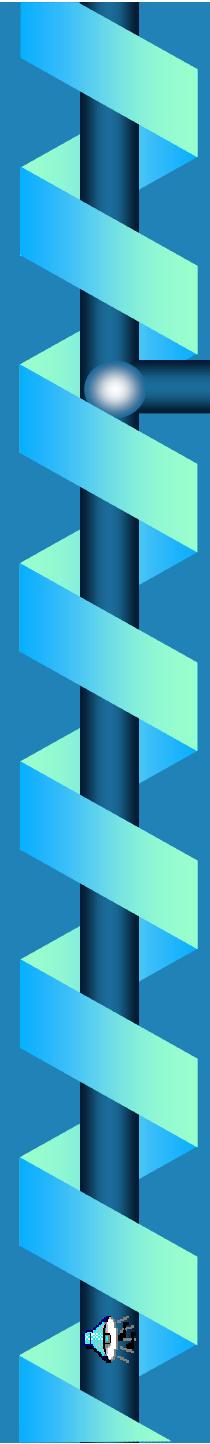

NOAA - Boulder, Colorado, USA

01.01.1994. situation

No.	Type	Processor	MHz	RAM	HDD	Monitor	OS
1	Kostel	286	12	2	42 Mb	b/w	Novell DOS 7
2	Kostel	286	25	4	70 Mb	color	N.DOS 7/WIN 3.1
3	ITS	286	22	2	44 Mb	b/w	Novell DOS 7
4	ITS	286	22	1	44 Mb	b/w	Novell DOS 7
5	ITS	386	33	2	41 Mb	b/w	Novell DOS 7
6	ITS	386	33	1	41 Mb	b/w	Novell DOS 7
7	Apple Macintosh		---	1	10 Mb	b/w	YU Mac Write
8	Olivetti	8086 M24	8	1	-----	mono	MS DOS 6.22

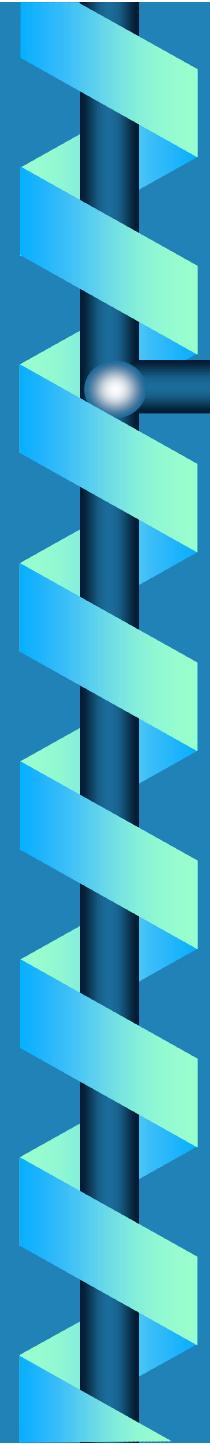

Classes started 1993/94 – 2nd semester

- **168 pupils grades 4th – 6th**
- **computer using basics**
- **operating system MS DOS**
- **programming language LOGO v.1.0**

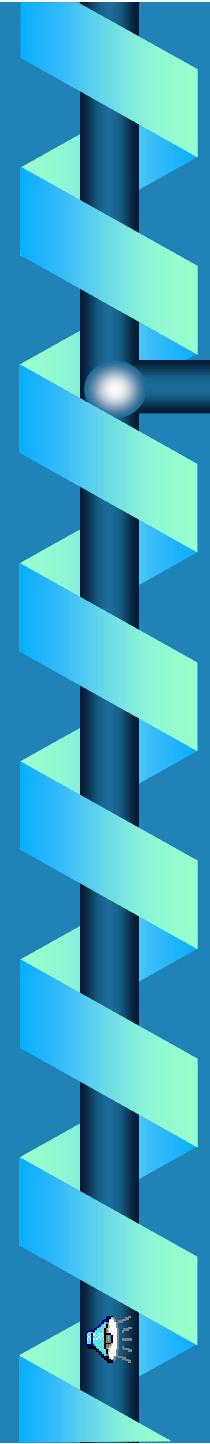

How did we go on ?

- **schoolyear 1994 - 95**
 - a new class room
 - 7th grade pupils join the classes
- **schoolyear 1995 - 96**
 - new functionaly designed furniture
 - installing security electrics
 - 8th grade pupils join the classes

How did we go on ?continued

- **schoolyear 1996 - 97**
 - buying new computers
 - building Local Area Network
- **schoolyear 1997 - 98**
 - teaching over LAN
 - connected to CARNet
 - using Internet in classes

Server zagreb.ostrst.hr

- starting **23.02.1998.**
 - **web server**
 - **ftp server**
 - **e - mail server**

what we have today ?

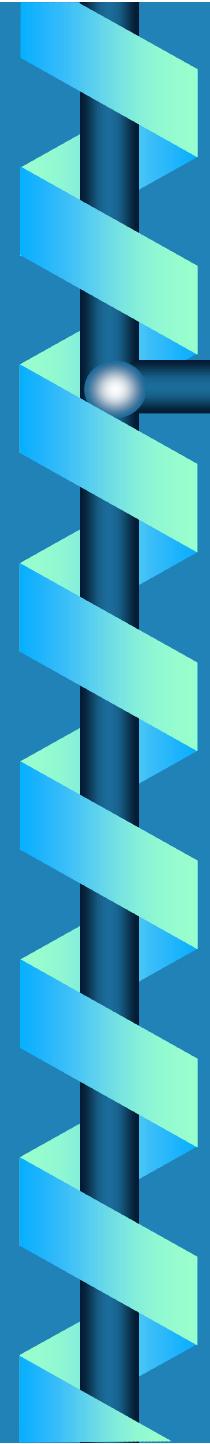

Primary School "Davorin Trstenjak"

H W Technical Characteristics

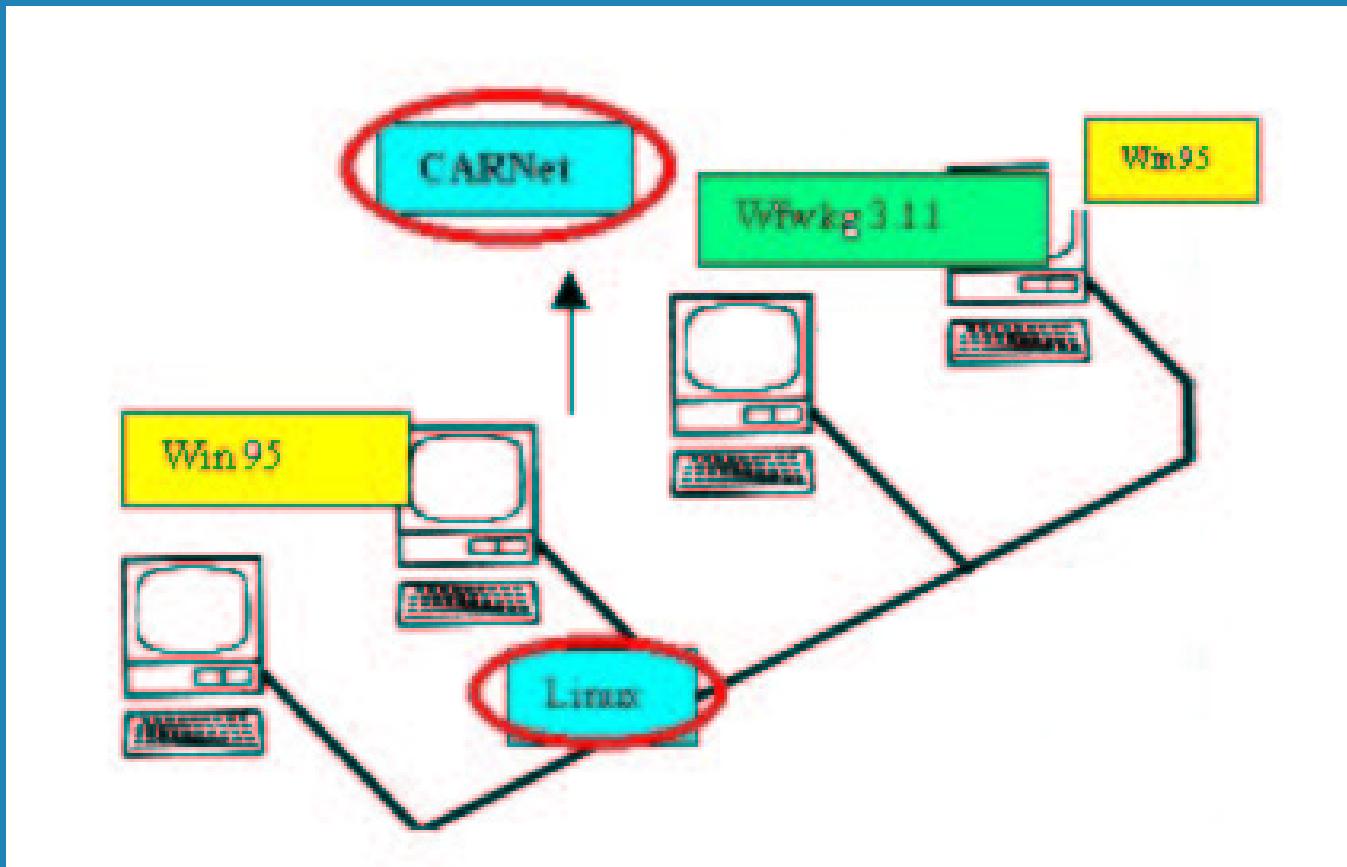

- **Ethernet Network Technology**
- **Compex RL2000A-PnP Cards
NE2000 (16bit) Compatible**
- **thinnet 10Base2 cables + BNC**
- **bus topology network**

S W Technical Characteristics

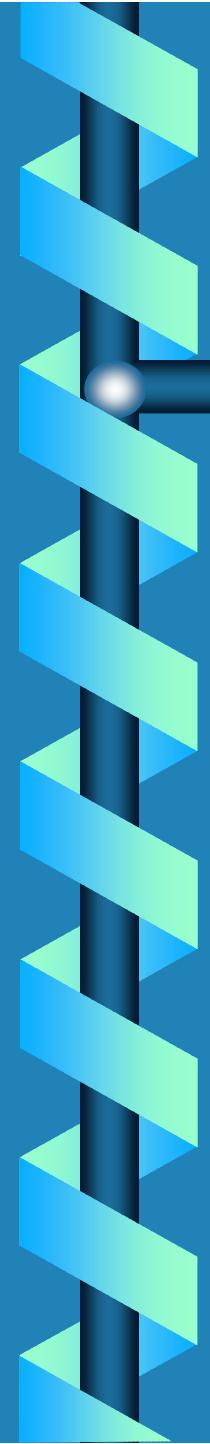

- **Windows 95**
- **Windows for Workgroups 3.11**
- **Debian Linux**
- **TCP/IP – SLIP protocols**

LAN Technical Characteristics

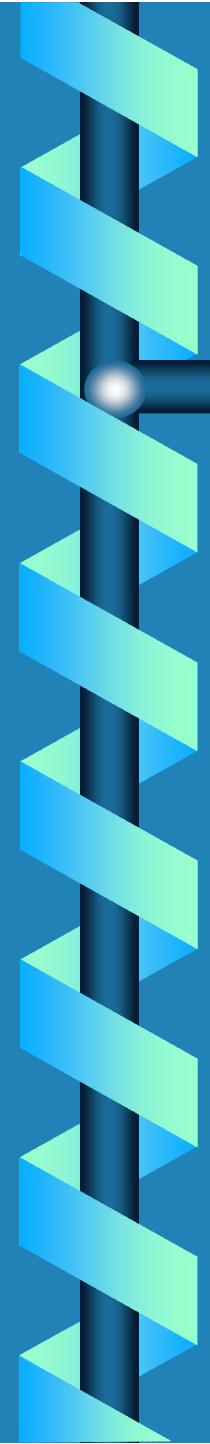

Local Area Network . . . improvements

No.	Type	Processor	MHz	RAM Mb	HDD	Monitor	Modem	OS

we did it our way – why....?

- **reducing cable "crowding"**
 - pupils security environment
- **number of active computers meeting actual needs**
 - work goes on even by individual “fallouts”

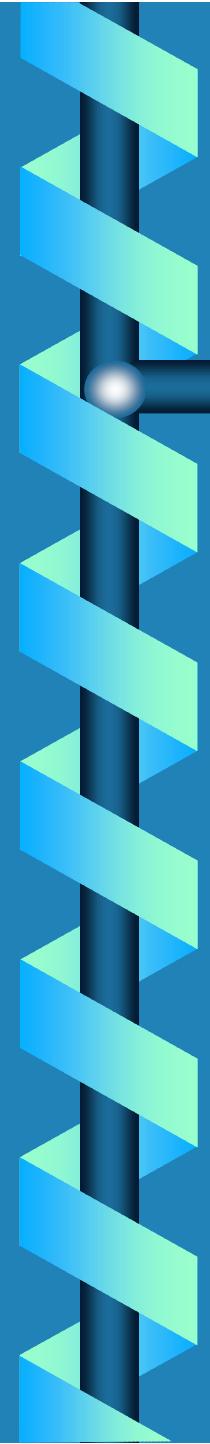

Win - Linux . . . why... ?

- **simple installation procedures**
- **easy network administration**
- **no “dedicated” server**
- **“non dedicated” server as needed**
- **Debian distribution stability/security**

Our current activities ?

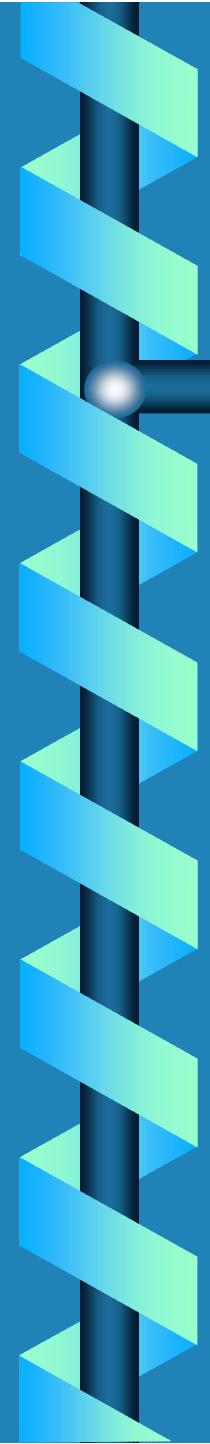

- **PC LOGO v.4.0**
- **Turbo PASCAL v.6.0**
- **MS Mail Office – LAN**
- **online “ Help Desk ”**
- **24 hours Internet**
www – ftp – mail
NOAA GLOBE server
- **competitions**

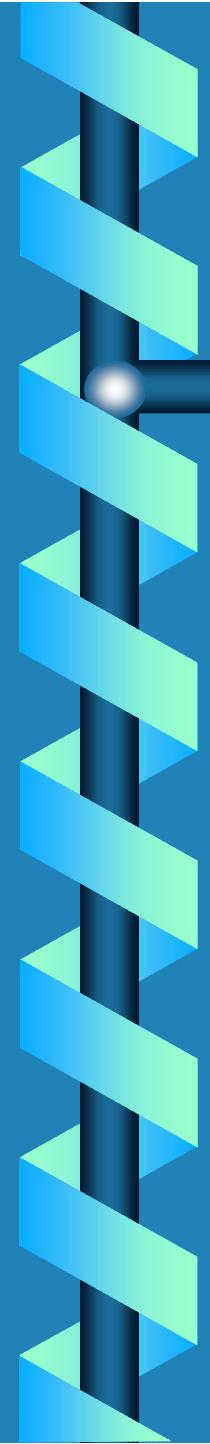

problems, problems

- **limited capacities**
 - **memory 8 Mb**
 - **hard disk 250 Mb**
- **sound cards & speakers**
- **graphics cards & color monitors**

serious problems

- **modern applications**
- **multimedia over LAN & Internet**
- **multiuser & multitasking**
- **interactive processing**

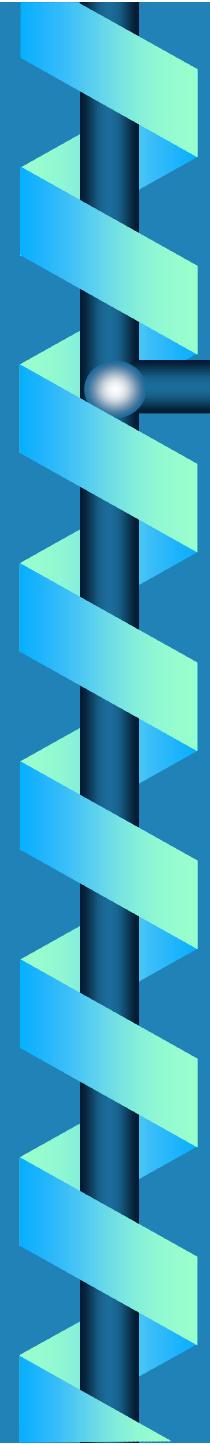

real troubles

- **security and protection**
 - **antivirus**
 - **firewall**
- **Linux server backup**
- **regular maintenance & upgrade**
- **sw licensing**

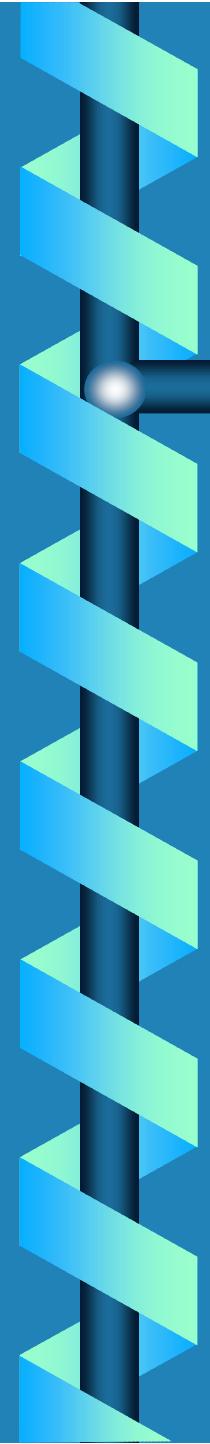

The aim of our work using even limited hw/sw resources

- 1. By choosing and adapting appropriate solutions we succeeded**
 - **create an environment for individual work for all pupils**
 - **motivate the students to acquire basic computer knowledge**
 - **encourage student's individual considering of applying computers in various fields of their everyday life and work**

our experiences

- 2. Waiting for “best up-to-date” equipment permanently postpones the opening of a computer classroom due to permanent increase of**
 - **technology development speed**
 - **multiplication of implementation and usage problems**

our future plans

3. all stages of development of a computer classroom should include

- companies donations and parents assistance / involvement**
- taking part in “non-computer” projects**
- reasonable and functional use of available hw/sw resources**
- a strong conviction that high educational performances can be achieved even out of hw below the minumum required**

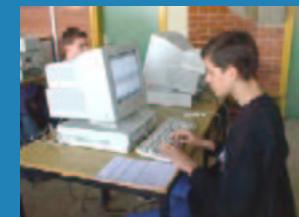

Instead of a conclusion

!

Hall of Fame

Primary School "Davorin Trstenjak"
Zagreb - Croatia

D M I H

National Primary&Secondary Schools Computer Science Championships

RYAN JAMES KUN

1995-1996 student 14th place
1998-1999 1st place

1996-1997 student 15th place

RELJA MEDIĆ 11th place

1995/97 student 15th place School MIOC

2001/02 DODON (6th grades) High School (USA)

Total participant ACSA 17th place USA

2002 SEPASCAL (7th grades)

1997/98/99/2000 student 11th place

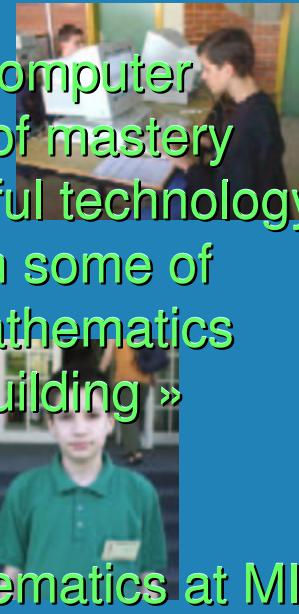

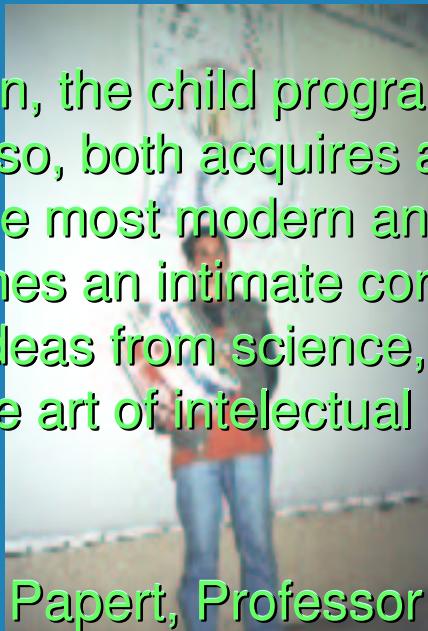

1998/99 student 11th place High School Zagreb,
1998/99 student 40th place "Jovan Vranjanin"

1999/00 student 15th High School

Hall of Fame

« In my vision, the child programs the computer and, in doing so, both acquires a sense of mastery over a piece of the most modern and powerful technology and establishes an intimate contact with some of the deepest ideas from science, from mathematics and from the art of intellectual model building »

Seymour Papert, Professor of Mathematics at MIT,
Author of LOGO Children's Learning Environment
